

Company Profile

Materials for India's semiconductor future

Meridian connects proven global suppliers of semiconductor packaging consumables with India's emerging OSAT ecosystem — starting from Gujarat.

01 / STORY

A new materials venture, built on an established industrial foundation

01	02	03	04
Global sourcing	Local access	Technical focus	Long horizon

Meridian did not start in a boardroom. It grew from a family business with decades of experience delivering electrical projects and building trusted industrial relationships across India.

As new OSAT facilities began taking shape near our base in Gujarat, we saw a familiar opportunity: get close to demand early, understand what the industry needs, and build the dependable supply relationships that help it scale.

02 / WHY NOW

India is building the next link in the global semiconductor chain.

India's Semiconductor Mission is bringing a first wave of assembly and test facilities online. Every facility needs a reliable flow of precise packaging materials — much of which is still sourced from outside the country.

03 / WHY GUJARAT

Close to the cluster. Ready for the long term.

With a group presence in Ahmedabad and an operating base in the Gujarat industrial ecosystem, Meridian is positioned to develop local stocking, responsive support, and shorter supply lines as regional OSAT demand grows.

The essential materials behind every packaged chip

Our first phase is focused: represent established manufacturers, develop Indian demand, and create a dependable bridge between global material expertise and local procurement.

01 Carrier tape

02 Dry-pack materials

03 Wafer tape

04 Bonding wire

05 / ROADMAP

A measured, long-term approach to India's materials supply chain.

Years 0–3	Agency & Distribution	Representing proven global suppliers and opening access to Indian demand.
Years 2–5	Stocking Distribution	Building local inventory, faster turnaround, and value-added finishing.
Years 4–8	Light Manufacturing	Progressing toward value-added consumables finishing and light assembly under India's evolving policy framework.
Years 8+	Materials Group	A broader platform serving India's compound semiconductor and OSAT ecosystem.

Indicative strategic roadmap; timing will respond to market demand, partnerships, and policy conditions.

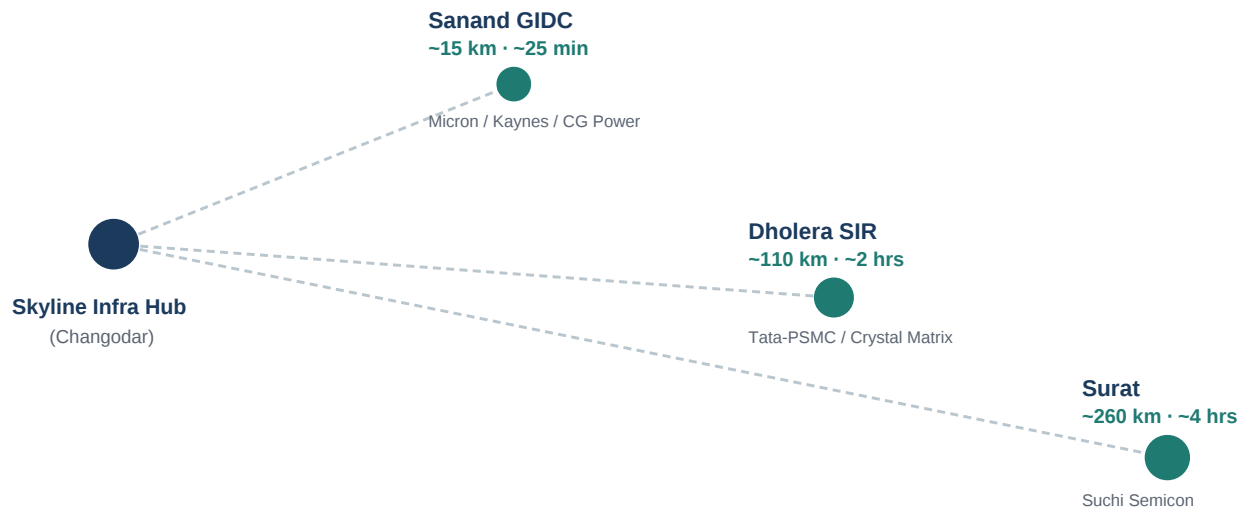

A physical base in Gujarat's OSAT cluster

Meridian's stocking and operations base sits inside the Skyline Infra Hub godown development in Changodar — purpose-built for proximity to Gujarat's growing OSAT ecosystem.

Address	B/h Intas Pharma & Chakde India Weighbridge Lane, Beside Claris, Matoda Patia, Ta. Sanand, Dist. Ahmedabad – 382220
Development	Skyline Infra Hub — a planned cluster of 92 godowns on the Sanand–Changodar industrial belt, each with a defined office area and parking
Footprint	3 sheds, all built to the same standard layout: ground floor (14'0" x 35'0" per shed) plus a double-height mezzanine floor
Layout	Ground floor: open shed with rolling-shutter loading access and an independent toilet. Mezzanine: double-height storage space with a dedicated office area — can be fitted out with AC and connectivity.
Specifications	RCC frame structure, 17 ft shed height, IPS flooring with trimex, glazed toilet tiling, dedicated 3-phase electrical connection, 24-hour water and security, R.C.C. internal roads and street lighting, planned drainage infrastructure, Wi-Fi zone across the estate
Certifications	No formal certifications currently held. ESD-safe flooring, climate control, and ISO 9001 certification are planned as part of our retrofit ahead of semiconductor-grade material stocking.

How close we sit to Gujarat's OSAT cluster

Skyline Infra Hub sits on the Changodar–Sanand industrial belt, minutes from the Sanand GIDC cluster and within a half-day's reach of every major ISM-approved semiconductor site in Gujarat.

Site	Facilities	Distance	Drive time
Sanand GIDC (Bol Estate)	Micron Technology (ATMP) · Kaynes Semicon (OSAT) · CG Power–Renesas–STARS (OSAT)	~15 km	~25 min
Dholera SIR	Tata Electronics–PSMC (fab) · Crystal Matrix (ATMP)	~110 km	~2 hrs
Surat	Suchi Semicon (OSAT)	~260 km	~4 hrs

Distances and drive times are approximate road estimates from Skyline Infra Hub, Changodar. ASIP Technologies (Andhra Pradesh) and Tata Semiconductor Assembly & Test (Assam) are outside Gujarat and sit beyond this proximity map.

Industrial credibility that cannot be shortcut

Meridian operates under the Jitendra Electricals / Jitendra Electrotrade umbrella. Based in Ahmedabad, Jitendra Electricals is a Government of Gujarat approved 'A' Class contractor with experience in turnkey HT and LT electrical projects across India, established in 1964.

- Government of Gujarat approved 'A' Class contractor
- Turnkey electrical project experience across India
- Schneider Electric authorized distributor
- Gloster Wires & Cables and Lucy Electric relationships

Why Meridian, specifically.

01 Boots on the ground

Three operational sheds in Changodar, within a short drive of most of Gujarat's OSAT cluster — a physical presence, not a trading-desk relationship.

02 Six decades of Indian industrial credibility

Operating under the Jitendra Electricals / Jitendra Electrotrade umbrella, with a track record in turnkey electrical projects and established supplier and regulatory relationships across India since 1964.

03 One local point of contact

A single Indian partner who navigates customs, ISM policy, and OSAT vendor-qualification processes on your behalf — no time-zone gaps, no language or documentation friction.

04 Low-risk, relationship-led entry

Non-exclusive representation with no minimum volume commitment — a way to test Indian market access before committing to direct investment.

Build the supply chain with us.

For global suppliers — Enter India with a local partner. Looking for informed market access and relationship-led representation in India's growing OSAT ecosystem?

For OSATs & component makers — Source with greater proximity. Looking for a responsive Indian source for semiconductor packaging consumables?
